

Milliken®

Milliguard™ AOX

Antioxidant for Polyurethane

Milliguard AOX Antioxidant

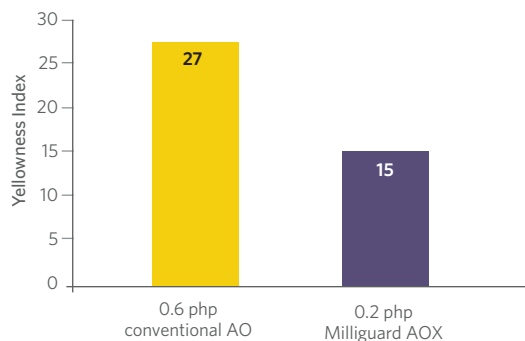

Milliguard AOX is a reactive, polymeric carbon-centered radical scavenger that protects thermoset polymers from oxidation degradation.

It is effective at low levels in polyurethane formulations to prevent scorch and in polyol manufacturing to improve stability.

Unlike most stabilizers, this antioxidant reacts into urethane systems resulting in significantly lower volatility and migration.

In addition, most hindered phenols and hindered amines cause yellowing when the urethane is exposed to nitrous oxide gas. Milliguard AOX does not contribute to color formation due to NOX gases.

Microwave Scorch Testing

Potential Performance Benefits

- Enabling higher quality foam through reduced discoloration
- Reducing scorch related scrap / off-quality
- Enabling the use of non-halogenated flame retardants by reducing scorch
- Increased productivity by increasing foam block size without scorch
- Increased quality of foams containing Natural Oil Polyols

Applications

- Furniture & bedding with or without flame retardants
- Automotive flame laminated grades
- Stay white foam / intimate apparel

Colorfastness to Burnt Gas Fading

AATCC Test Method 23; 30 hrs, 58 °C, Propane
